European Research Council
Established by the European Commission

ERC Frontier Research Grants Information for applicants to the Starting and Consolidator Grant 2014 Calls

3 March 2014 (see updates on pg. 2)

2 – Administrative data of participating organisations

The first sub-section lists the participating organisations. The first form is given for the host institution. If other organisations are involved, additional forms will appear for each partner added in Step 4 of the online submission system. For each institution many fields will be read-only data as registered and/or validated in the central registry of organisations of the European Commission, linked to the given PIC number in the Beneficiary Register (previously the URF).

Host institution (applicant legal entity)

Host Institution	
Participant Identification Code (PIC)	[pre-filled] – The Participant Identification Code (PIC) enables organisations to take advantage of the Participant Portal. PIC numbers are necessary for the submission of proposals. By entering a PIC, section 2 will be filled in automatically. An online tool to search for existing PICs and the related organisations is available at http://ec.europa.eu/research/participants/portal/desktop/en/organisations/register.html . Organisations not yet having a PIC must self-register (via the same page) before submitting the proposal. . Failure to do so will block the submission of your proposal.
HI Legal name	[pre-filled]
HI Short name	[pre-filled]
Address of the organisation

2010 NOVEMBER-DECEMBER No. 377

November 01, 2010 [posted]
April 02, 2014 [Editor's note added]

PubMed® Author ID Project

The National Library of Medicine® (NLM®) National Center for Biotechnology Information (NCBI) is developing a system that will address the problem of ambiguous author names within PubMed and facilitate accurate search and retrieval of a participating author's works. The specifics of PubMed Author ID, as the system is now known, are still evolving. It is currently envisioned that authors (or their designees) would register for the service through My NCBI and identify their research articles in PubMed using provided tools; this identification of articles will allow NCBI to link alternate names/spellings associated with an individual. The anticipated launch for PubMed Author ID is in mid-2011.

NLM has already laid the foundation for the system by developing a process for NIH-funded authors to identify their articles for grant reporting purposes. NLM expects to make PubMed Author ID interoperable with multiple external author ID systems, such as those developed by publisher groups, non-profit organizations, and other countries. NLM has not yet identified external author ID systems that it will incorporate in PubMed Author ID, but will work with outside groups as systems are developed in this rapidly evolving area.

Update

Editor's note: This information was added on April 2, 2014.

Currently, NLM is not developing a PubMed Author ID system. However, NLM accepts author identifiers from outside organizations like ORCID when supplied to us by publishers with citation data. Also, PubMed disambiguates authors using the Computed Author display sort. Please see the [NLM Technical Bulletin](#) article "[PubMed and Computed Author Sorted Display](#)" for more information.

Finally, we encourage all PubMed authors to create, maintain and share their own list of PubMed citations in the My NCBI My Bibliography feature. For more information please see [My NCBI help](#).

Què és ORCID?

- ORCID facilita el registre únic i gratuït per investigadors i col·laboradors que participen en el procés de publicació científica
- ORCID ofereix a la comunitat una API per incrustar els identificadors en els CRIS i d'altres
- ORCID és codi obert i s'encoratja a la comunitat a desenvolupar eines i serveis. El codi està disponible a GitHub.
- ORCID iDs enllaçant amb d'altres identificadors d'investigadors
- ORCID és una organització non-profit que es finança amb quotes de membres

Què estan fent les universitats?

- Insertant l'identificador al LDAP, al CRIS, al repositori de tesis
- Agafant les dades del registre ORCID i exportant-les al CRIS, actualitzat el repositori
- Permeten la importació de informació del CRIS al registre d'ORCID
- Enllaçant a identificadors de la institució
- Creant iD pel PDI, estudiants, personal (afil·liació)

<http://orcid.org/organizations/researchorganizations>

ORCID i les universitats

- Alfred P. Sloan Foundation (US) finança projectes liderats per universitats i associacions professionals que desenvolupin ORCID <http://orcid.org/content/adoption-and-integration-program>
- Jisc i ARMA (UK) han publicat una convocatòria per finançar projectes per l'implementació d'ORCID a institucions d'educació superior
http://www.jisc.ac.uk/fundingopportunities/funding_calls/2014/03/orcid.aspx
- Use cases, workflows, i codis seran els temes del ORCID Outreach meeting del maig 2014
<https://orcid.org/events/Chicago2014>

Adoption and integration program

A Catalunya

Universitats catalanes acorden l'ús de
l'identificador ORCID per als seus investigadors

24-10-2013

La Universitat de Barcelona, l'Autònoma de Barcelona, la Politècnica de Catalunya, la Pompeu Fabra, la de Girona, la Rovira i Virgili, la de Lleida, l'Oberta de Catalunya, la Ramon Llull, la de Vic i la Internacional de Catalunya han acordat utilitzar el sistema únic i unívoc d'identificació ORCID per als autors de la producció de recerca que es genera en aquestes universitats.

- 3575 autors tenen ORCID
- Portal de la recerca de Catalunya 2014?
 - Grup de treball d'ORCID
 - L'ORCID ha d'estar al CRIS
 - Les universitats tenen camp ORCID en el CRIS
 - Algunes universitats el demanen a convocatòries internes
 - Difusió des dels vicerektorats i biblioteques
 - UNEIX el demanarà de forma opcional en properes trameses

Si tens un ORCID usa'l !

Marc L. Greenberg

Professor of Slavic Languages and Literatures
Chair, Department of Germanic Languages and Literatures
Ph.D., UCLA

mlg@ku.edu
785-864-9171
2079 Wescoe

I am interested in synthesizing techniques and learning from multiple disciplines to find novel ways of understanding and reconstructing language history. In particular, I use the comparative method, supplemented by sociolinguistics, geolinguistics, and cognitive linguistics, and I also consider external historical and prehistorical (archeological) data. Most of my work applies to Slavic languages and languages in contact with them (Romance, Germanic, Finno-Ugric).
