

Treballs de les Trobades de Menorca 2017

[Electron phonon interaction without unphysicals results](#)

E. Colomés, Z. Zhan, D. Marian and X. Oriols

[On the computation of multi-time quantum correlations: the case of electron transport with electron-phonon scattering](#)

Devashish Pandey, Guillermo Albareda, Xavier Oriols

[Modeling of a Tunable Graphene - Semiconductor heterojunction for photodiodes](#)

Ferney A. Chaves, David Jiménez

Thermal transport in organic glasses: an “experiment-inspired” theoretical investigation
Riccardo Dettori & Luciano Colombo

[Part 1](#)

[Part 2.1](#)

[Part 2.2](#)

[Part 3.1](#)

[Part 3.2](#)

[Electron tunneling through a ferromagnetic insulating induces spin filtering effect](#)

Lluís Balcells, Laura López-Mir, Carlos Frontera, Hugo Aramberri, Jose Cisneros Fernández, Karim Bouzehouane, and Benjamín Martínez

[Reduction of thermal conductivity in Si and III-V semiconductors in hexagonal phases](#)

Martí Raya-Moreno, Xavier Cartoixà, Hugo Aramberri, Juan Antonio Seijas-Bellido and Riccardo Rurali

[Hydrodynamic heat Equation in semiconductors](#)

P. Torres, J. Camacho, J. Bafaluy, F. X. Alvarez, X. Cartoixà, A. Ziabari, A. Shakouri

[Computing at the fundamental energy limit](#)

Miquel López-Suárez, Igor Neri and Luca Gammaitoni

[Time Domain Spectroscopy THz-Time Domain Spectroscopy of 2D materials: graphene, MoS of 2D materials: graphene, MoS2](#)

David Arcos, Daniel Gabriel, Núria Ferrer-Anglada

[Quasiparticles, Casimir effect and all that: Conceptual insights](#)

Hrvoje Nikolic

[Coupled Electron-Nuclear Dynamics without Born-Oppenheimer Potential-Energy Surfaces](#)

Guillermo Albareda

[Modeling of Metal-Insulator-Graphenes Diodes for RF Applications](#)

Fran Pasadas and David Jiménez

[Managing Thermal Transport in Nanowires](#)

Riccardo Rurali

Thermal properties of high pressure silica from first principles
Hugo Aramberri, Riccardo Rurali & Jorge Iñiguez

[Part1](#)

[Part2](#)

[Managing Thermal Transport in Nanowires](#)

Riccardo Rurali

[A Phononic Switch based on Ferroelectric Domain Walls](#)

J. A. Seijas-Bellido, C. Escorihuela-Sayalero, M. Royo, M. P. Ljungberg, J. C. Wojdel, J. Iñiguez, R. Rurali

[Understanding the quantum-to-classical transition without entanglement to an external environment](#)

Xavier Oriols, Marc Cejalvo and Albert Benseny

[Spin injection into semiconductors from tunneling through spin-split states](#)

Xavier Cartoixà
